# ICEMAN BODY TEMPLATE - assembly map

339.7 x 587.9 mm outline | soften r=8.0 mm | 3 x 2 sheets, 15 mm overlap

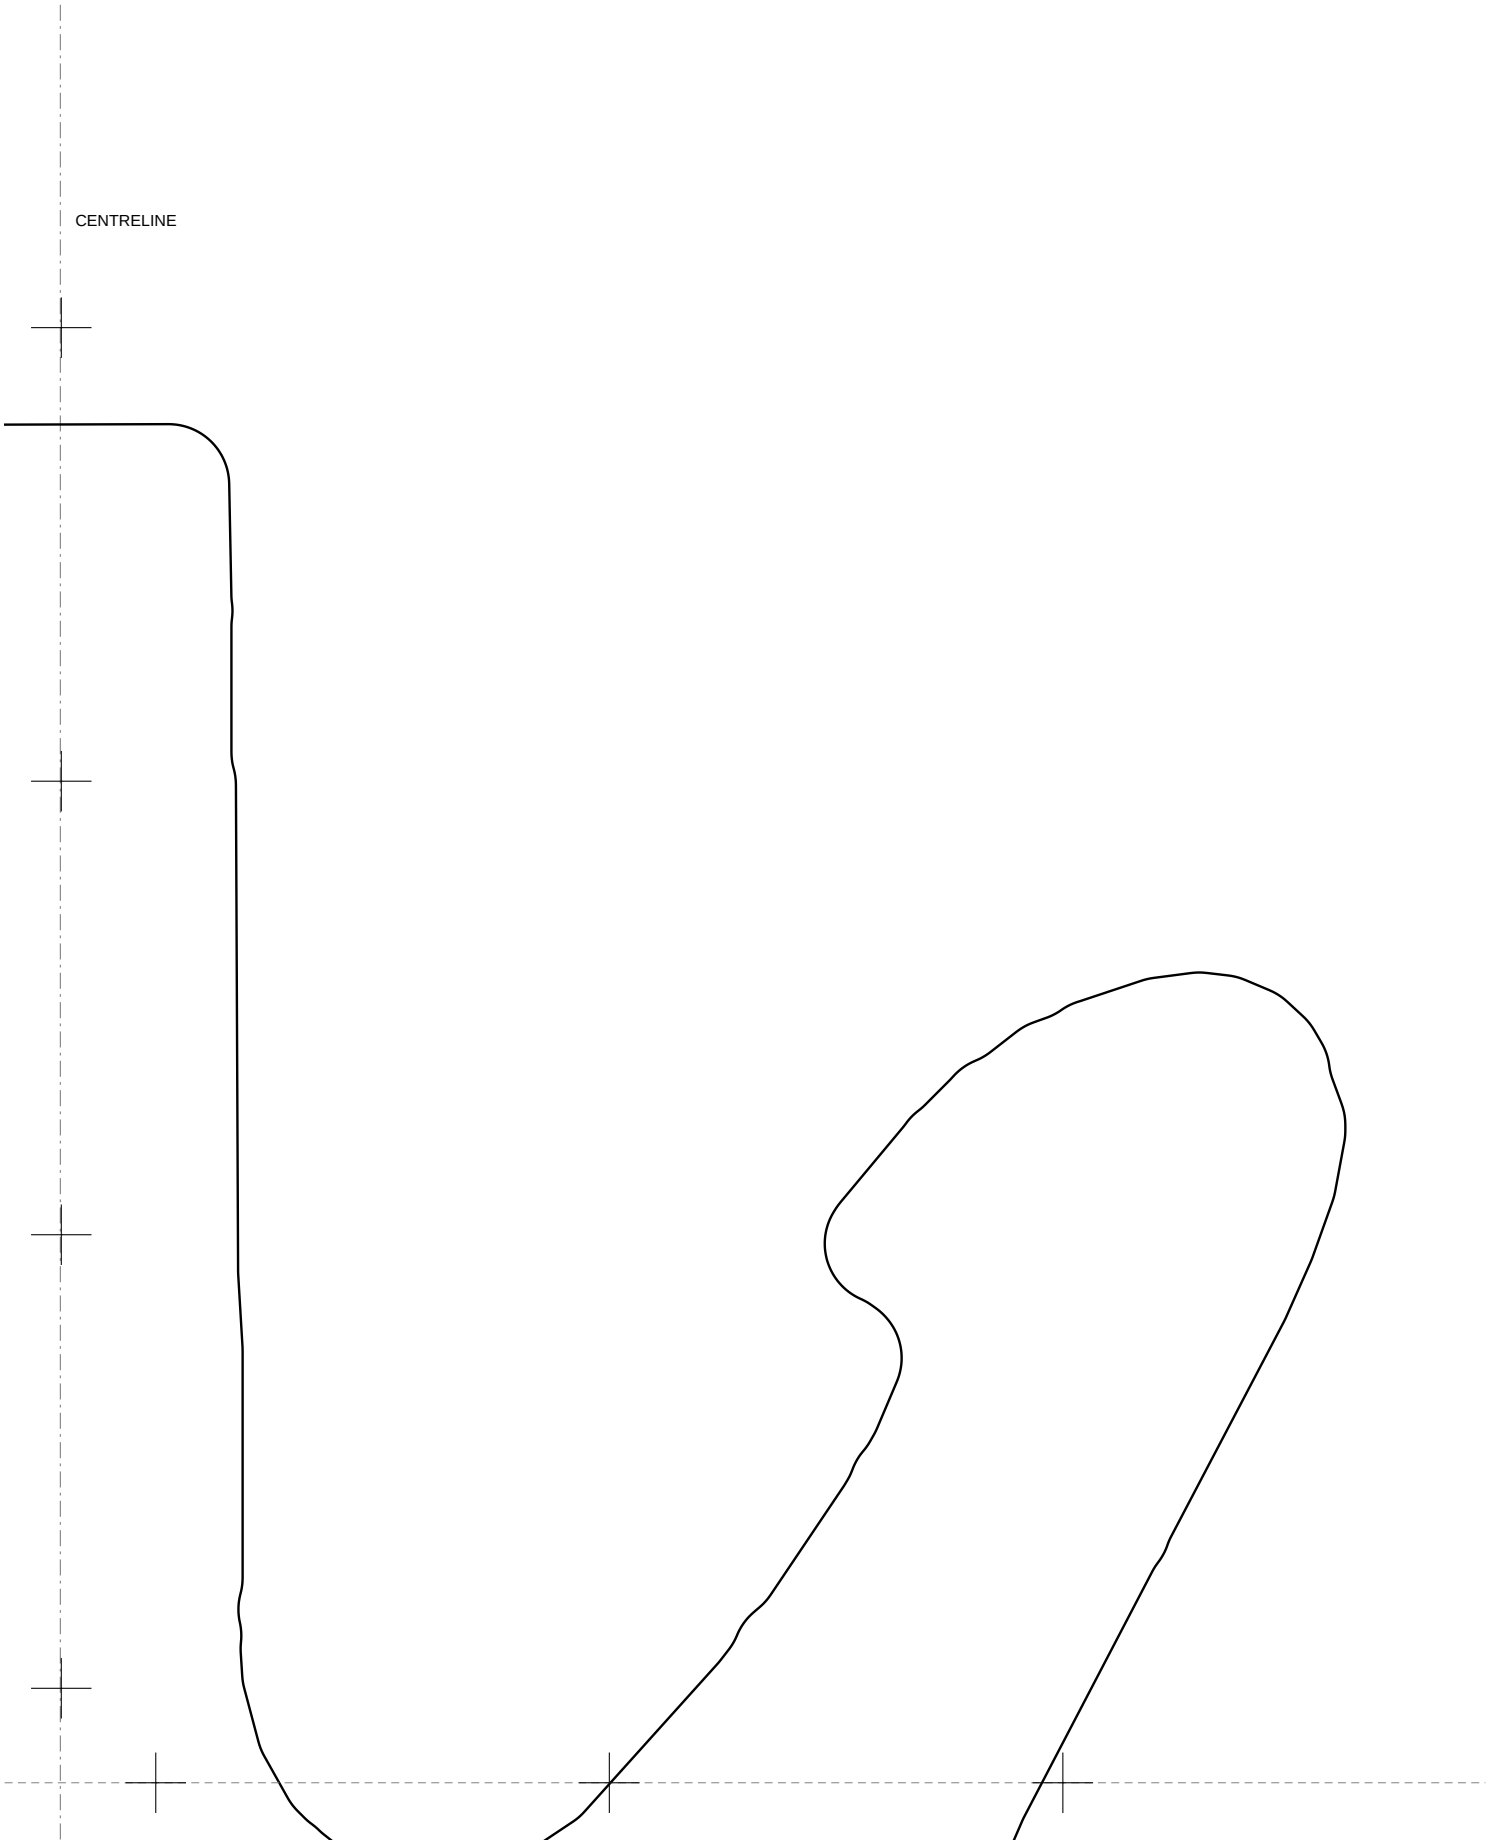

1. Print at 100% / Actual Size. Turn OFF 'fit to page' and 'shrink oversized pages'.
2. Check the 100 mm ruler in every footer with a steel rule. If it is off, the print is off - fix it, do not compensate.
3. Trim each sheet along the dashed line on its RIGHT and BOTTOM edges only.
4. Lay sheets out per this map. Slide until the + crosses in the overlap sit exactly on top of each other, then tape.
5. The dash-dot line is the body centreline. It must be dead straight across the whole assembly - that is your check.
